Remove overlaps, Merge, Set Hole Sewing have been moved to the Home tab under the Modify Overlap pull down menu. You can also find the Modify Overlap by right mouse clicking.

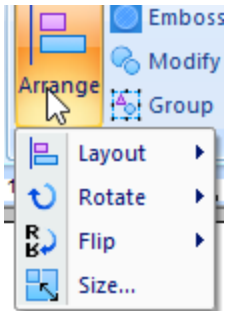

Under the Group menu in the Edit area on the Home tab, you will find, Group, Fit Text To Path and Release Text from Path. In this version of the software Fit text to Path is called Fit Text to Outline. Release Text from Path is called Release Text from Outlin.

The Arrange tools have also been moved to the Home tab. Part of them are in the Edit Area under the Arrange down arrow, part of them are in the Copy area. In addition, Resize has been moved from the Edit tab to the Arrange pull down menu. In the Arrange pull down menu, you will find All the Layout / Alignment options. Go to Arrange, choose Layout and then you will find the Alignment options. Rotate is in this menu as well as the Flip tools (Horizontal and Vertical). All of these items can be found by right mouse clicking as well. Below are screen shots for the pull down menu and the right mouse click menu.

The right mouse click menu will also let you choose Stitch Type from the pull down menu. In addition to choosing the stitch type, you choose Not Sewn instead of clicking on the Line Sew Button or Region Sew Button to turn off stitches. This can also be done by selecting the item and clicking on the Tab that activates at the top of the window.

The Mirror copy and Circle copy tools have been moved from the Arrange tab to the Copy area on the Home Tab under Arrange Copy. In Addition, a new Matrix copy has been added. If Optimize Sewing Order is checked, the copies will color sort when appropriate (if the colors don't overlap).

When an item is drawn, its tab is now called the Shapes tab  instead of Outline Attributes or Manual Punch.

If an item is in stitch format, the tab is Stitches  instead of Stitches Attributes.

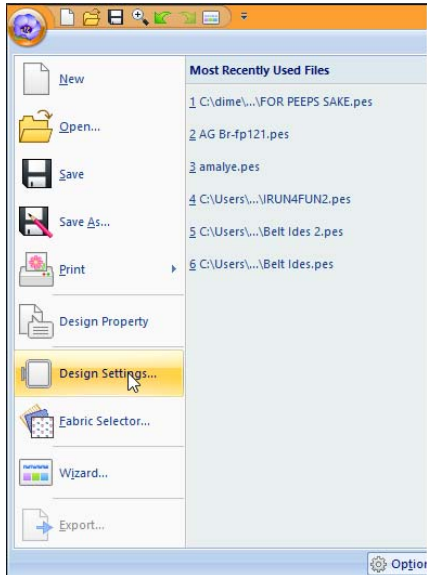

All of the drawing tools are now in one location under the Shapes pull down menu.

The Design Settings (hoop selection menu) can be found from the file pull down menu . I have made a quick access shortcut for this on my computer so that it can be easily located.

The Zoom Tools are all located in a central area in the Tools area along with the Pan and Measure tool. There is a down arrow next to Zoom in and Zoom out. This is where you will find Zoom all, Selected object zoom and Actual size zoom.
